

B15000

B15000

This remarkable rig can drill 350mm diameter holes in just about anything up to 22m deep. The rig can operate inside buildings and tunnels. It's small size has given contractors greater flexibility in hole placement and design. Existing structures can now be worked around rather than removed, thus saving time and expense.

It's outstanding features are:

- Restricted access, restricted headroom capability.
- Rubber tracks for less footprint damage.
- Mast tilts for and aft and side-to-side.

Technical Data

Height when drilling	3270 mm
Transport height	2700 mm
Width	1500 mm
Length	3280 mm
Weight	4070 kg
Mast length minimum	2340 mm
Max torque	1500 Nm
